MUHAMMAD YAHYA AR RAYHAN

Junior Full-Stack Web Developer, Software Engineering student, SMK IDN Boarding School

array248@gmail.com | +62 857 7004 8248 | github.com/aarayhan | Malang, Indonesia

PROFILE

Web developer focused on Laravel and Filament. I build management systems that real people use: a boarding house system for my family's business, now growing into a SaaS product called MyKos.id. Self-taught since 2022 and studying Software Engineering since 2025. Available for an internship from March 2027.

TECHNICAL SKILLS

Backend: PHP, Laravel, Filament, Livewire, Inertia, REST API

Frontend: HTML, CSS, JavaScript, TypeScript, Tailwind CSS, React, Next.js

Database: PostgreSQL (including Row Level Security), MySQL

Tools: PHPUnit, Git, GitHub Actions, Docker, Composer, Vite, Figma

Other: Python, PySide6

PROJECTS

MyKos.id: Multi-tenant boarding house SaaS

Laravel 13 · Filament 5 · PostgreSQL 18 · Sep 2026 to now

- SaaS version of GrandKos: every owner gets an isolated workspace, separated at database level with PostgreSQL Row Level Security.
- Rooms, residents (encrypted ID numbers and ID photos), invoices, deposits, front desk, and WhatsApp payment reminders from each owner's own number.
- 241 automated tests, including security rules that each have a test proving one owner never sees another owner's data.
- Preparing a free beta for 15 to 20 owners. Next: an AI assistant owners command through WhatsApp.

GrandKos: Management system for a family boarding house

Laravel 13 · Filament 5 · PostgreSQL · Jul to Sep 2026

- In use at Grand Kedawung Syariah, my family's boarding house. Replaced a paid boarding house app, with the old data imported.
- Automatic monthly billing, deposits and refunds, WhatsApp reminders and monthly reports, accounting reports (cash flow, profit and loss, ledger, balance sheet).
- Two properties in one app, roles with Filament Shield, email OTP two-factor login, daily backup. 105 automated tests.

PayWind: Payroll management system

Laravel · Livewire/Flux · MySQL · Docker · May 2026 | github.com/aarayhan/PayWind

- Indonesian payroll with salary components, PTKP status and PPh 21 TER brackets, processed in payroll batches.
- Admin and employee roles, audit log for every payroll action, 54 automated tests.

PomeloO: File converter for Windows

Python · PySide6 · GitHub Actions · Oct 2026 | github.com/aarayhan/PomeloO · pomeloo.netlify.app

- Desktop app: drag a file, tap a key, pick a format. 275+ conversions and 34 tools, all processed on the user's PC.
- Released with an installer, automatic updates, and a website rebuilt by CI after each push.

Smaller projects

- **Bibliotheca**: e-library with Laravel, Inertia and React, using the Google Books API. github.com/aarayhan/bibliotheca-Elibrary
- **Filmer**: movie watchlist with Laravel and the TMDB API. github.com/aarayhan/filmer
- **PadViolett**: bookstore in native PHP and MySQL: cart, orders, admin panel. github.com/aarayhan/project-ecommerce
- **Trackify**: productivity tracker in JavaScript with a Pomodoro timer and task analytics. github.com/aarayhan/Productivity-Tracker

ACTIVITIES

IT FEST 2026, Institut STTS | Oct 2026
Team of 3. Designed SiklusKu, a privacy-first period tracker web app; my part was the solution design. Also our school final project.

IDN Mengajar outreach | Oct 2026
Offered SMK IDN's teaching program to about 48 high schools and vocational schools in Malang, by email.

EDUCATION

SMK IDN Boarding School | 2025 to 2027
Software Engineering · Solo, Karanganyar

SMP IDN Boarding School | 2022 to 2025
Jonggol, Bogor

Self-taught programming | Since 2022
Web development, PHP, JavaScript and Laravel through personal projects and online courses
